

CONFIDENTIAL

1 April 1983

MEMORANDUM FOR: Fred Demech
Deputy Executive Director, PFIAB

FROM: Executive Assistant/Executive Director

1. Enclosed are 15 documents containing sensitive material which is originator controlled (ORCON). I am sending them to your office for the use of the Department of Commerce consultants who are preparing the study on the Soviet economy. It is requested that the material and any sensitive classified notes based on the material be retained by PFIAB. These documents were released subject to the following caveats:

- Classification and controls must be retained on the documents, notes and the final study.
- The consultants must be informed of the exact meaning of each control marking.
- Any utilization by the consultants of the ORCON information contained in these documents must carry over the same classification and controls, must during the draft and review stage show the source of the information, and be cleared in draft by CIA with regard to its use and distribution before any further distribution is made.

2. I spoke with [redacted] about handling this material in this matter and he agreed to inform the consultants of these arrangements.
